

Self Help - System Check

Self Help

There are many things you can do before needing to bring you computer in for service.

If you think you have spyware, malware or viruses on your computer, you can use a free online Spyware Scan tool to check.

Note: the Spyware Scan software powered by Webroot SecureAnyware will instantly begin downloading to your computer. Spyware Scan software is not affiliated, or maintained by Hopedale Technologies. You must agree to Webroot SecureAnyware's terms and conditions before use.

Download for Windows OS

Download for Mac OS

Should these scans find any issues, please reach out to us. We can help!
